

Patterson Avenue

Winston-Salem, NC

RKA Services

- Traffic Signal Design
- Electrical Detail Design
- Local Agency Coordination

RKA has contracted with the Piedmont Triad Research Park to develop traffic signal and electrical detail design plans for the upgrade of the existing traffic signals at the Patterson Avenue/Fourth Street and Patterson Avenue/Fifth Street intersections associated with a streetscape project along the corridor. The existing traffic signals are wood pole designs and the signal upgrade will consist of special metal pole/mast-arm installations. RKA is working closely with the City of Winston-Salem during the development of the plans.
