

Wilmington Signal System

Wilmington, NC

RKA Services

- Citywide Signal System Analysis
- Recommendations
- Electrical Detail Design
- Agency Coordination

RKA provided field investigation and base pad recommendations for 205 intersections throughout entire City system and 39 electrical detail designs for 2070L equipment for City signals only.

The analysis was a result of the City of Wilmington signal system upgrade that included the replacement of older TS-1 signal equipment with state-of-art 2070L equipment including fiber optic interconnect centers and CCTV camera surveillance.
