

US 70 Transportation Study

Havelock, NC

RKA Services

- Traffic Study
- Thoroughfare Plan Review
- Sidewalk Master Plan
- Traffic Circulation Patterns
- Traffic Signal Warrant Analysis
- State and Local Coordination

RKA provides on-call traffic engineering and planning services for the City of Havelock. Numerous intersections along the US 70 corridor in Havelock were evaluated for safety and operational needs. A safety study was completed at intersections along US 70 to recommend potential safety improvements at key intersections. In addition, RKA completed a thoroughfare plan review and recommendations, developed a city sidewalk master plan, traffic study reviews, and traffic circulation patterns for congested areas. Our team developed conceptual improvement plans of corridor improvements at one intersection to improve traffic flow, traffic safety, and mobility. RKA also conducted traffic signal warrant analyses for two (2) existing intersections at Hollywood Boulevard and Forest Hill Drive along US 70 in Havelock, NC.
